

## Model Contracts for the Interior Design Professional

The Interior Designers of Alberta are pleased to announce that a set of model (standardized) contracts for the interior design professional practicing in Alberta have been developed with the assistance of construction/contract law specialists at the law firm of Brownlee Fryett.

Two sets of forms are available: a short form and a standard (long) contract. The long form is intended for use on design projects that are broad in scope and complexity. The short form is intended for smaller projects with a limited scope. A detailed set of schedules and guidelines on how to complete them are also included.

The forms are available in CD-ROM format. While you will not be able to make changes to the original disc, the forms may be down loaded to your computer hard drive and revised as necessary for each ensuing project. This particular CD-ROM format was developed to ensure that you will always have an *original* version of the forms on file.

The forms are reasonably priced as follows:

**IDA Members:** \$100 per set of forms (or \$75 per individual set) plus GST

**Non-Members:** \$250 per set of forms (or \$150 per individual set) plus GST
